

INTRODUCTION TO ZMA SERIES MICROWAVE BALANCED MIXERS

Standard Level
(+7 dBm LO)

ZMA Series

ZMA-2 1.0-2.5 GHz \$ 49.95 (1-9)
ZMA-3 1.4-3.0 GHz \$ 54.95 (1-9)

FAST DELIVERY
From stock, one week max.

FEATURES

- BROADBAND 1.0-3.0 GHz
- HIGH ISOLATION 30 dB
- LOW CONVERSION LOSS 7dB
- IF RESPONSE TO DC
- SMA 3mm CONNECTORS
- DELIVERY ONE WEEK
- LOW PRICED \$49.95 (1-9 QUANTITY)

APPLICATIONS

- FREQUENCY MIXING
- PULSE AND AMPLITUDE MODULATION
- PHASE DETECTION
- CURRENT CONTROLLED ATTENUATION
- FAST SWITCHING

DESCRIPTION

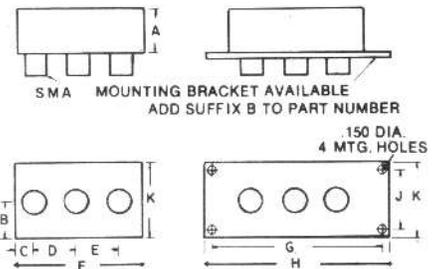

The ZMA series mixers are very economically priced while covering the broad frequency range from 1000 MHz to 3000 MHz. They offer low conversion loss, 7 dB, and high LO-IF isolation 50 dB, over most of its frequency range.

Available with SMA (3 mm) connectors the ZMA series is housed in a die cast aluminum case. These rugged units are shielded to meet your tough RFI requirements. The case is finished with a blue baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A.

Every unit is 100% tested and inspected under strict MCL quality control standards to ensure superior electrical performance and reliability.

Ruggedness and durability are built into the ZMA series. Only well matched hot-carrier diodes and ruggedly constructed transmission line transformers are used. Internally, every component is bonded with silicone rubber to provide protection against shock, vibration, and acceleration.

The exceptional low cost of the ZMA series is attributable to the breakthrough in production techniques achieved during the manufacture of the widely acclaimed Mini-Circuits SRA series of PC board mounting mixers. Utilizing this technology the ZMA series is offered at a remarkable price of 1/2 to 1/3 the cost of competitive units. The ZMA series provides performance, quality, and low cost.
